Blended Learning

Revolutionizing training
with innovative
technologies

MULTILINGUAL & MULTINATIONAL

Each training service is available in all major languages, featuring scenes and information specific to the country and region.

ONLINE LEARNING

Our comprehensive library of interactive modules is easy to access and utilize. Training is specifically designed to encourage driver engagement and learning.

VIRTUAL REALITY

VR modules give drivers a fully immersive training experience to tackle specific behavior. Innovative technology allows for replication of unique driving environments.

SIMULATOR TRAINING

Easy to transport between sites, our simulator training can be used for groups as well as individual drivers. The revolutionary training mimics specific driving environments and scenarios.

Comprehensive range of modules

We utilize the latest technology to bring organizations revolutionary learning solutions. Our online training modules encompass all key areas, encouraging positive driving behavior and essential learning. We build training solutions bespoke for sites and organizational need, allowing for specific management of identified risks.

Our VR and simulator training is tailored to specific journeys, routes and sites that have been highlighted as high-risk areas to mitigate drivers' exposure to risk. Our groundbreaking solutions can create specific driving scenarios that are hard to replicate through in-vehicle training services.

Popular courses:

- ▶ Mirrors and Blind Spots
- ▶ Distracted Driving
- ▶ Parking and Maneuvering
- ▶ Personal Safety and Security
- ▶ Collision Breakdown Management
- ▶ Site Familiarization
- ▶ Speed Awareness
- ▶ Anticipating Other Motorists

Using the latest
technology to offer
the most innovative of
learning solutions
