# Driver Risk Assessments

We get to know the risks your drivers face

## How it works

### ONLINE QUESTIONNAIRE

Drivers complete a 10-minute risk assessment online regarding their driving attitudes, vehicle and exposure to risk.

## Typical assessment, action plan and follow up

- Drivers assigned risk levels following questionnaire
- Training recommendations for high-risk drivers
- Solutions tailored to individual driver needs
- Training outcomes factored into managerial reports and risk recalculation
- Risk levels updated in response to convictions, collisions and changes to vehicle or journey
- Full administrative support and IT back-up

## Interventions focused to individual-specific risks

### DRIVER RISK RATING

Drivers are given an individual risk rating of Low, Medium or High upon completion of their online questionnaire.

### ONLINE REPORTING

Managers receive access to online reporting and essential driver information. This includes completion rates, risk ratings and license info.

### TARGETED SOLUTIONS

From the risk assessment results, targeted solutions to the needs of the individual driver are identified, such as online and in-vehicle training.

### REDUCED DRIVER RISK

Driver risk is substantially reduced through effective use of the driver risk assessment results and the implementation of targeted training.
